AimBetter

Our technology enables organizations to maintain their databases efficiently, saving time & money!

AimBetter is a database performance monitoring (DPM) solution that empowers database administrators with in-depth insight into their database infrastructure. The system monitors and alerts all the inconsistencies which it detects to then offer solutions for performance-improvements, efficiency and uptime. In a nut-shell, AimBetter makes critical applications run faster. It may be applied even as a supplemental utility to whichever solution an organization may be currently using. AimBetter real-time monitoring capabilities enable you to quickly identify the sources of performance-issues, be it from an application code, low database maintenance, infrastructure issues, security violations, or data-loss.

FUNCTIONS

- Improves Response-Time
- Tracks 400+ Metrics
- Monitor Security Violations
- Analyze Slow Transactions
- Activate DBA to be Proactive
- Lead Database to Efficiency
- 360 Database Insight
- Single-Page Dashboard
- Correlates All Data
- Performance Monitoring
- Reports Query Exceptions
- Unexpected Behavior Alert
- Detects Network & Internet Issues
- Query Time-Outs & Deadlocks
- Access Any Period of Time for Analysis
- Detect Data-Loss & Uncommitted Transactions

WHAT YOU GET

- Improved System Performance
- Enhance Management Capabilities
- Reduce Cost of Maintenance
- Improved User Satisfaction
- View All-Layers of the Infrastructure
- A Healthy, Worry-Free and Peace-of-Mind IT Operation

"The only service in the world that monitors & unravels all fundamental SQL Server issues in real-time AND guides you to the best solutions for optimized performance!"

PRICE INCLUDES

- Hosting/Storage Cost
- Cost of Repository Server
- Repository Database License
- Product Installation Fee
- Product Maintenance Fees
- Anytime Tech-Support Fees
- Initial Alerts-Setup

GREAL SOLUTION SCENARIOS

- Want to eliminate troubleshooting?
- Need a fast error-detection system?
- Speed-up SQL performance?
- Identify critical data-loss?
- Current solutions don't scale?
- Want DBA oversight & support?
- Want a complimentary solution?
- Distinguish between IT DevOp & DBA Problems!
- Allocate the proper resources to solutions
